

Hi Matt,

Here are clips from old newsletters of the Subaru 360 Driver's Club, that refer to NAPA items that have been identified as crossovers for Subaru 360 brake parts. As you can see, owners of this car have been experimenting with various bits and pieces to keep their cars on the road for some time.

Thanks much for your efforts. If there is any more to be gotten re: crossovers that NAPA offers, as I mentioned, contact Ed Parsil at [subaru360nut@aol.com](mailto:subaru360nut@aol.com)

Best Regards,  
Steve

RUBBER BRAKE SYSTEM PARTS - NAPA wheel cylinder kit #1146 fits REAR on Subaru 360 sedans with 11/16" rear cylinders. The NISSAN number for

ANOTHER BRAKE LIGHT SWITCH that is identical to the Subaru 360 sedan unit (bullet terminals) and will work in truck/van by grafting new ends on the wires, is NAPA SL-134. Thanks to Vince for this tip also.

**REAR WHEEL CYLINDER, SEDAN & YOUNG, 11/16"**

Identical to many Subaru & Honda seals. NAPA Part #1164

Most NAPA stores also stock wheel cylinder seals by SIZES. Bring in an old one that is not swollen and a competent parts person can match it.

BOBBY DECOLA found that tie rod ends for a '75 BMW 530i can be made to work on Subaru 360 trucks & vans. NAPA part # is 269-2562, BECK-ARNLEY

MORE GOOD NUMBERS FOR BRAKE PARTS: BOBBY DECOLA found that NAPA kit #1752 has 2 15/16" seals that will fit truck/van front wheel cylinders. It also has 2 boots that will not fit any Subaru 360. He also found that NAPA kit #1096 has 2 3/4" seals that don't fit any Subaru 360, BUT the boots in that kit can be adapted to fit any Subaru 360 front wheel cylinder. I found a RAYBESTOS kit that has 2 13/16" seals that will fit the front wheel cylinders of Subaru 360 sedans - it's #WK1097, and can be special-ordered at Pep Boys for about \$10. It also contains 2 useless boots. Since the RAYBESTOS and NAPA numbers for the 15/16" kit are both 1752, it is likely that NAPA uses the same numbers as RAYBESTOS for the same application. NAPA may just repackage RAYBESTOS parts. ERIC STEVENSON found that RAYBESTOS kit WK2134 has the right seals for Subaru 360 sedan front wheel cylinders, and RAYBESTOS kit WK1924 has the right seals for truck/van rear wheel cylinders. You can
